

Extended training on the colorful film PPF application.

Benefits of Training

The training is dedicated to individuals with experience in the application of PPF protective films who want to systematize and deepen their knowledge. The aim of the training is to convey not only substantive knowledge but, above all, practical knowledge. Our main goal is to provide our participants with the ability to independently apply colored PPF film. The application of PPF is a fairly complicated and demanding process, which is why we primarily focus on individual training, although there is a possibility of creating groups of 3-4 people. The training concludes with the awarding of a certificate confirming the acquired skills and knowledge.

Conditions for participating in the training

To take part in the training, it is necessary to provide:

- personal data of the participant (i.e. first name, last name, and PESEL)
- billing information (the reservation is guaranteed by the payment)

there is a possibility of obtaining funding for training

Training Plan

- Introduction: theoretical part, types of films, tools, chemistry, organization of the workplace; independent work under the instructor's supervision: wrapping all external elements of the car
- Improvement of application techniques under the trainer's guidance
- Improvement of application techniques on various car elements
- Chemistry + cosmetics + ceramics for the maintenance of X-Colors films
- Q&A, daily discussions

The training agenda may change depending on the skills and level of advancement of the participants.

Information about PPF application training
