

Benefits of Training

The training is dedicated to individuals with experience in applying paint protection film (PPF) who want to learn how to work with colored PPF. The training focuses on imparting knowledge that is not only theoretical but, above all, practical. Our main goal is to provide our participants with the ability to independently apply colored PPF. The application of PPF is quite a complicated and demanding process; however, after acquiring the necessary knowledge from qualified trainers, it will not pose a problem. The training concludes with a diploma certifying the skills and knowledge acquired.

Conditions for participation in the training

To participate in the training, it is necessary to provide:

- personal data of the participant (i.e. first name, last name, and PESEL number)
- invoice details (the reservation of a place is guaranteed by payment)

*there is an option to apply for funding for the training

Plan of the training

10:00 – 10:30 arrival of participants, coffee, welcome

10:30 – 11:00 brand presentation, previous activities, introduction of the trainer
